## New Comic Book Introduced on The Collectors Show

PRWEB.COM Newswire

Houston, Texas (PRWEB) September 20, 2013

Emmy Award winner, owner of <http://www.lunchboxcollector.com> and the artist and writer of a new comic book, "Amphoman," appears this week on "The Collectors Show" hosted by Harold Nicoll. The popular podcast can be heard on [Web Talk Radio](#).

Kaye first appeared on the program several years ago to discuss his expertise as a lunch box collector. He came back to host and

producer Harold Nicoll's attention in August 2013 when Nicoll learned of the new work on a new comic book. "Amphoman is a perfect comic character in that his 'super powers' are both helpful and carry considerable downside," Nicoll said. "That Mike is such a gifted artist, has so much expertise as a collector and is now writing and drawing his own comic book will be extremely interesting to listeners. Imagine you had the chance to interview or listen to Stan Lee at the start of his career, that's the way I felt about talking with Mike."

Kaye took his interest in comics to another level of creativity, but it was several years before Kaye published it and made it available to the public. In 1989, out of Kaye's imagination, came Dr. Ulrius Joules, a doctor suffering from cancer. He discovers an extraterrestrial gem that transforms him into a frogman when he gets wet. "Amphoman" can treat others and stop them from being infected. During the interview, Kaye describes the character in detail and discusses how he struggled to get his comic book noticed. "Listeners will have the chance to know more about the author/illustrator and how to order a first edition comic from the writer," Nicoll concluded.

### About The Collectors Show

Some collectors are casual about collecting and pick things up to add once in a while. These are not the people we talk to on The Collectors Show. Our guests are single minded folks whose collections are not just important but help to define them. They have a passion, and laser-like focus that gives insight into not just what makes for an interesting or even valuable collection, but let's us peer into their souls. To contact Harold Nicoll, email [haroldnicoll\(at\)gmail\(dot\)com](mailto:haroldnicoll(at)gmail(dot)com).
